

GET INVOLVED: Student Clubs & Orgs

BASIC TIPS:

- Joining student professional organizations or clubs can open the door for you! They can help you build your resume, and network. Take advantage of the opportunity!
- Be thinking about the student organization and how it is going to align to:
 - Your interest
 - Your major
 - Your long-term career goals
- Joining multiple organizations that aren't going to benefit what you want to do could be perceived as a waste of time.
- Couple your inside the classroom curriculum with your outside the classroom curriculum. Some of the clubs you join should supplement what you are learning in the classroom.
- If you find an organization that you have passion around, consider taking on a leadership role. That shows you are not just a "member" but are there to play an active role and make a change. That will help you to stand out even more to employers!
